

HAIR

Hair

Why is it there?

People stop and people stare

Everywhere

When I walk out of the door
It flows from my armpits
And down to the floor

When I go out in the street
It grows from my head
And down to my feet

When I smile it gets in my mouth
I'm all hairy
West, north, east and south

When I eat it gets in my food
I'm so hairy
I never get nude

No one can tell
If I'm happy or sad
No one can tell
If I'm good or I'm bad
I brush my body
And I brush my teeth
I'm hairy above
And I'm hairy beneath

When I look it gets in my eyes
I see the world
Through a hairy disguise

When I cry it wipes up my tears
I've been hairy
For months and for years

THUNDER BOX

Thunder box

Doing the Thunder Box

Bring the rainmaker
There's going to be a storm tonight
Make the earth shake
Jumping up and down all through the night

**We're going to do a dance
Like a lightning storm
Never in the same place twice
Move it all around
At the speed of sound
Come on everybody
Don't play nice**

Thunder Box

Doing the Thunder Box

Wind grows higher
There's going to be a storm tonight
Your feet are on fire
Jumping up and down all through the night

Bring it on
Bring it on

Thunder rolling
There's going to be a storm tonight
Devil patrolling
Jumping up and down till morning light

CAT SCRATCH FEVER

Playing with puss in the garden
I have got nothing to fear
Sweet little pussycat loves me forever
And never would cause me to shed any tear

We dig small holes and we leap after butterflies
Birds flutter by in the afternoon singing
And then ... pussy claws
And she scratches me

Puss is so sorry she hurt me
She has that look in her eye
So I forgave her to return the favour
She gives me a lick where the blood trickles by

We play till lunch then we go to the kitchen
Where mother is fixing a sandwich with ham and cheese
Then ... pussy claws
And she scratches me

Civilised pussies don't hurt you
They're like your bestest of friends
I tell her that as she sits on the mat by the end of my bed
And we both make amends

We read a book about lions in the jungle
And pictures of jaguars going for the jugular
Then ... pussy teeth
Then ... pussy claws
Then pussy smiles

...

TUG

If you want to pull a boat
Then who do you call
Tug Tug
If you want to push and shove
With your back to the wall
Tug Tug

Get it to the harbour
Then get it out
Forward or backwards
Inside out
Tug Tug

**We just can't do without our
Tug Tug
Don't doubt it**

Sound the alarm
And full steam ahead
Tug Tug
Take it or leave it
You'll go where you're led
Tug Tug

Who's got the power?
Who's got control?
Harbourmaster says
It's time to rock'n'roll
Tug Tug

Salt in the water
Salt in the air
Tug Tug
Brave little boat
She just don't care
Tug Tug

Could be an iceberg
Could be a whale
Could be a taniwha
Lashing with its tail
Tug Tug

**We just can't do without our
Tug Tug
Don't doubt it
We love our
Tug Tug**

FAR AWAY

Far away
The ship sets sail
On to foreign islands

Time to leave
Time to go
Cos the tides tells me so
Come with me

On a wing and a prayer
Let the winds take us
Far far away

Floating gently
Out to sea
Dolphins leap beside us

Up we go
And down the other side
Fast then slow
This rollercoaster ride

Storm clouds pass
The ship sails on
Flying fish to guide us

MEDUSA

They call her Medusa
The Belle of the Ball
They wine her and dine her
But she has no brains at all

Medusa
Medusa
The Belle of the Ball

She glides to the ballroom
She looks like a queen
She twirls and she dances
As if she's in a dream

She's pretty and she's dangerous
She's like a wish come true
She is just a jellyfish
Her body is see-through

They call her Medusa
The Belle of the Ball
She goes with the flow
But she has no heart at all

YOU'RE A DRIP

You're a drip
You join with others of your kind
From the lakes to streams
To oceans
You come as rain
To earth from dark clouds above
Always in a downward
Motion

We try and catch your drippiness
We need it for life
We try and squeeze you into
A series of pipes

You're a drip You're a drip You're a drip

We turn on
Our taps and out you just come
We're lazy, we like it
That way
And when we've had enough
It's easy, we just turn you off
And trapped in our plumbing
You stay

You seem so clean we drink you
We wash and we spray
And when we've finished, unplug you
You just go
Away

You're a drip You're a drip You're a drip

Fish swim in you
Dive down deep

We call you drink
And liquid and water and bath
And puddle and dampness
And rain
We sip and
We swallow, eventually we flush
Thanks for coming
Nice to see you
Again

Where do you go?
Where are you headed so moistly and wet?
Out to the sea and oceans
And rivers
I bet

You're a drip You're a drip You're a drip

TIME GOES BY

Bury me under a tree
Let the great moonbeam
Smile down on me

Bury me under a stone
Let the birds sing
So I won't be alone

**I will rise
Just like a sunflower
My face to the day**

**I will fly
Through the effortless hours
That get tick-tocked away
Time goes by**

Show me the mountains and streams
Let me ride the wind
To the land of your dreams

Show me more
Secrets now spoken
Will unlock the door

**I will rise
Just like a sunflower
My face to the day**

**I will fly
Through the effortless hours
That get tick-tocked away
Time goes by**

Look at the ground down below
Smallest spring seedlings
Are starting to grow

Look at the stars up above
For millions of years
They have witnessed our love

**I will rise
Just like a sunflower
My face to the day**

**I will fly
Through the effortless hours
That get tick-tocked away
Time goes by**

INSETERCISE

Insects Insects
Don't be shy
Stretch your legs
And stretch them high
Thorax in
Antennae free
I won't sting you
If you won't sting me

Insects Insects
Bend those knees
All six of them
Together please

Except for spiders
You have eight
And centipedes
Now don't be late

Insects Insects
Lift those weights
Especially ants
Just concentrate

Build those muscles
Hard and strong
Come on now
It won't take long

Stretch those legs!
Bend those knees!
Lift those weights!
1,2 3

Insect power
Insect might
The Insect Army
Will march tonight!
